

Oracle Cloud Bitesize

Kickstart your move
to Oracle Cloud

ORACLE

Platinum
Partner
Cloud Standard

Oracle Cloud Managed Service Provider

Although Cloud computing promises to be a fundamental transition in the evolution of IT, we understand that for companies new to Cloud, knowing where and how to start can prove difficult. Even if you already have experience of Cloud offerings such as Microsoft Office 365 and Azure, AWS and Google Cloud you may not yet have considered or experienced Oracle Cloud.

That's why we've created the Oracle Cloud Bitesize package. Designed to enable you to kickstart your move to the Cloud. Oracle Cloud Bitesize enhances your knowledge, removes risk and helps you to navigate your first Oracle Cloud migration with ease. With our support, you can become an effective champion of Oracle Cloud and demonstrate the measurable benefits of Cloud adoption to your organisation, including lower costs, greater agility and better resource utilisation.

- ✓ Implement your first steps to Oracle Cloud
- ✓ Get your questions answered
- ✓ Win over your colleagues
- ✓ Reduce risk to your organisation
- ✓ Create a clear roadmap for next steps

What do you get with Oracle Cloud Bitesize?

1. Oracle Cloud orientation workshop

During this interactive 1-day onsite workshop for you and your organisation, you will gain:

- An overview of Oracle Cloud, its capabilities and how it differs from other Public Clouds
- Opportunity to explore different use case scenarios to support your business and strategy
- Support in making informed decisions about the use of Public Cloud technologies
- Answers to your commercial and technical questions
- Digital versions of our presentations and resources to share with your colleagues

2. Oracle Cloud Bitesize deployment as Proof of Value

To provide your business with Proof of Value, we will implement a bitesize instance of Oracle Cloud for your organisation.

- Set up your chosen Oracle Cloud Bitesize environment and configure the connectivity
- Introduce your staff to the new environment
- Demonstrate functionality and performance in a Cloud environment
- Test various back-up and DR scenarios
- First-hand experience of your chosen option working in the Cloud

3. Technical support and next steps to Oracle Cloud roadmap

Having deployed your bitesize instance of Oracle Cloud, we will work with you to ensure that you feel confident in your move to Cloud and your organisation's next steps.

- Access to support for your Bitesize instance
- Ability to raise support tickets and get your questions answered
- Support in developing a roadmap for your organisation's Oracle Cloud strategy, including first move recommendations
- Exploration of the benefits of wider Cloud migration and total cost of ownership
- Support in running a range of scenarios through our Oracle Cloud Calculator and comparison to AWS
- Documentation that enables you to internally champion the value of Oracle Cloud adoption
